OCCUPATIONAL HEALTH AND SAFETY

Tools for Your Toolbox: Protect Yourself & Others from Illness

Viruses that cause illnesses like flu, COVID-19, and respiratory syncytial virus (RSV) are especially active in winter. Take care to protect yourself and others from becoming infected:

- **Get immunized!** – Flu & COVID-19 shots are covered by your UVA insurance. Talk to your doctor if you would like to know more about RSV immunization.
- **Seek testing if you have symptoms or have been exposed** – Tests, some of which are available for at-home use, can quickly detect these viruses so you can quickly seek treatment and take action to protect your family, friends, and coworkers.
- **Effective treatments are widely available** – Anti-viral medications are available for flu and COVID-19 and can reduce the likelihood of severe illness, hospitalization, and death.
- **Masking, physical distancing, washing hands, and improving air-flow** in the places where you live and work provide additional protection for everyone.

Learn more from the US Centers for Disease Control & Prevention:

If you're sick:

- ★ Stay home.
- ★ Get tested.
- ★ See your doctor.

Did You Know? Winter Advisory Definitions & Safe Driving

Winter weather is looming. Know the meaning of the different weather advisories! View them here: <https://at.virginia.edu/LDljFh>

If you must drive in wintry conditions, make sure to do so safely! Here are some tips to keep you and others on the road safe:

- **Make a plan.** Notify your supervisor you are on the way or may be late.
- **Increase your follow distance:** Add 5-6 seconds between you and the person in front of you.
- **Try not to brake hard, slow down progressively.**
- **Take your time!**
- **Keep your speed steady.** This allows better control of the vehicle.
- **Increase and decrease your speed slowly.**
- **Keep the vehicle's tank at least half full.**
- **Do not use your phone while driving.**
