CONSTRUCTION PROJECT ALERT
University Cemetery Expansion

Items of Interest: Erection of construction fence around University Cemetery Expansion site, closure of Cemetery Road

Project Background: The Cemetery Expansion project is part of a long-term planning effort to increase capacity in the University Cemetery. The expansion will add new walls containing 572 columbarium niches and over 250 in-ground plots to the University Cemetery. The project will shorten Cemetery Road, eliminate 8 parking spaces, and create a new turn-around that preserves an existing spruce tree. Work hours will be 8:00am-5:00pm, Monday-Friday. Construction is slated for completion in June, 2016.

Imminent Activity: On December 18th, fencing will close Cemetery Road and cut off pedestrian access from Hancock Drive for the duration of the construction project. Construction work will temporarily eliminate all parking on Cemetery Road. Facilities Management is working with Parking & Transportation to relocate permit holders.

See attached site diagram for fence layout
