CONSTRUCTION ALERT

Report No. 17

CONCERNING IMMINENT CONSTRUCTION ACTIVITY

35kV Ductbank Project

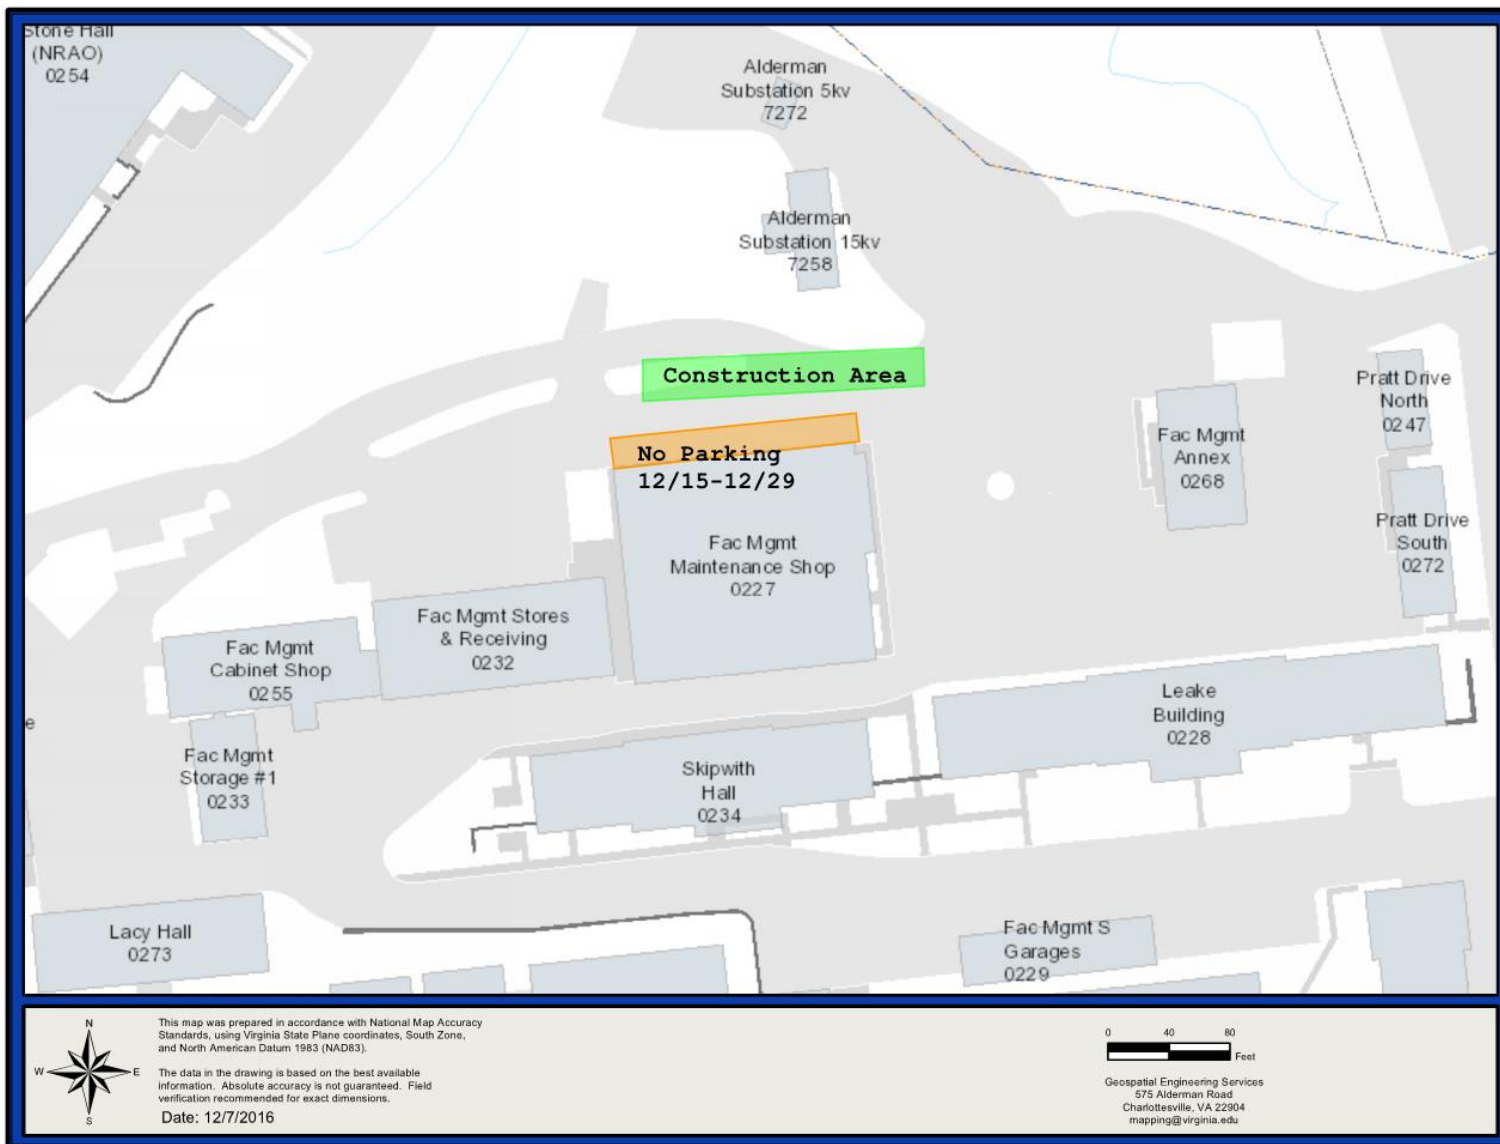

ITEMS OF INTEREST: Faulconer will be expanding their construction site next to the Alderman substation. Please do not park in front of the FM Shop building from Dec. 15 to Dec. 29. The parking area will need to remain open to allow delivery vehicles access to the loading dock while construction is in the fire lane.

BACKGROUND: The 35kV Ductbank Project will install 2.75 miles of 35 kV electrical ductbank to provide a dedicated underground power feed to the University of Virginia. The new ductbank will connect the existing Sherwood, Alderman, and Cavalier substations through a combination of two, four, and six way underground ductbanks consisting of 8" PVC conduits encased in concrete. Large concrete electrical vaults will be installed at approximately 500 foot intervals along the ductbank, the largest vaults measure 9'x9'x17' outside dimensions. The installation of the ductbank requires road closures in several areas.

INTERIM ROUTES: There is additional overflow parking in the lot near Hereford College.
