CONSTRUCTION ALERT

CONCERNING IMMINENT CONSTRUCTION ACTIVITY

35kV Ductbank Project Update

ITEMS OF INTEREST: Sections of the northbound lane of Alderman Road will be closed for the next several weeks from 7am to 4pm. The southbound lane of Alderman Road will remain open. Flagmen will be in place to direct two-way traffic around the construction activity.

Dominion will be pulling electrical cables between the underground vaults in the road.

BACKGROUND: The 35kV Ductbank Project will install 2.75 miles of 35 kV electrical ductbank to provide a dedicated underground power feed to the University of Virginia. The new ductbank will connect the existing Sherwood, Alderman, and Cavalier substations through a combination of two, four, and six way underground ductbanks consisting of 8” PVC conduits encased in concrete. Large concrete electrical vaults will be installed at approximately 500 foot intervals along the ductbank, the largest vaults measure 9’x9’x17’ outside dimensions. The installation of the ductbank requires road closures in several areas.
