CONSTRUCTION ALERT

CONCERNING IMMINENT CONSTRUCTION ACTIVITY

35kV Ductbank Project Update

ITEMS OF INTEREST: Beginning Aug. 21st and continuing through August 25th Dominion will be pulling cable in isolated spots along Crispell Drive from 8:15pm until 5:55am each night. This work will start near the intersection with Lee St. and proceed down the road away from the hospital and past South Garage. During this time one lane of Crispell will be closed to allow for the work to take place with flaggers in place to maintain two-way traffic at all times.

BACKGROUND: The 35kV Ductbank Project will install 2.75 miles of 35 kV electrical ductbank to provide a dedicated underground power feed to the University of Virginia. The new ductbank will connect the existing Sherwood, Alderman, and Cavalier substations through a combination of two, four, and six way underground ductbanks consisting of 8” PVC conduits encased in concrete. Large concrete electrical vaults will be installed at approximately 500 foot intervals along the ductbank, the largest vaults measure 9’x9’x17’ outside dimensions. The installation of the ductbank requires road closures in several areas.
