CONSTRUCTION ALERT

CONCERNING IMMINENT CONSTRUCTION ACTIVITY

35kV Ductbank Project Update

ITEMS OF INTEREST: Pike will be working in small sections of the northbound lane of Alderman Road for the next several weeks. Flagmen will be in place to facilitate two-way traffic around the work areas.

BACKGROUND: The 35kV Ductbank Project will install 2.75 miles of 35 kV electrical ductbank to provide a dedicated underground power feed to the University of Virginia. The new ductbank will connect the existing Sherwood, Alderman, and Cavalier substations through a combination of two, four, and six way underground ductbanks consisting of 8” PVC conduits encased in concrete. Large concrete electrical vaults will be installed at approximately 500 foot intervals along the ductbank, the largest vaults measure 9’x9’x17’ outside dimensions. The installation of the ductbank requires road closures in several areas.
