CONSTRUCTION ALERT

CONCERNING IMMINENT CONSTRUCTION ACTIVITY

35kV Ductbank Project Update

ITEMS OF INTEREST: On October 13 and 14, a corner of the FM parking lot will be blocked off by Dominion vehicles to install two power poles along Alderman Road. All activity will take place within the FM lot.

BACKGROUND: The 35kV Ductbank Project will install 2.75 miles of 35 kV electrical ductbank to provide a dedicated underground power feed to the University of Virginia. The new ductbank will connect the existing Sherwood, Alderman, and Cavalier substations through a combination of two, four, and six way underground ductbanks consisting of 8” PVC conduits encased in concrete. Large concrete electrical vaults will be installed at approximately 500 foot intervals along the ductbank, the largest vaults measure 9’x9’x17’ outside dimensions. The installation of the ductbank requires road closures in several areas.
