CONSTRUCTION PROJECT ALERT

East Range Stormwater Management Phase II

Items of Interest: Pedestrian walkway closure

Project Background: The Hotels and student rooms along the East Range of the Academical Village have been subject to water intrusion since original construction. The East Range Stormwater Management project aims to address stormwater issues between the East Lawn and East Range in order to remediate water intrusion at the East Range buildings, address overall stormwater management in the area, and improve the aesthetics of alleys and parking courts.

Phase I included archaeology, potholing to find exact locations of existing underground utilities, and waterproofing along the west side of the East Range. Phase II is currently underway and planned to be complete in April 2019. Phase II involves extensive stormwater infrastructure installation in the alleys and parking courts.

Imminent Construction Activity:
Work at a manhole south of Hotel D will require a pedestrian walkway closure Tuesday, November 20-Wednesday, Nov 21. A mulch path will be provided around the obstruction.

See attached site plan for work location.
