Lawn Accessibility Project: Construction Alert No. 1

Background:

On Thursday, June 7, 2018, the University’s Board of Visitors approved a project to construct two permanent ADA ramps on the Lawn, located adjacent to Pavilions V and IX. These ramps will provide a permanent, continuous, barrier-free route to traverse the Lawn terraces from the Rotunda to Old Cabell Hall. The BOV approval has released this project to begin this summer.

Upcoming Construction Activity:

Pre-construction archaeology will begin in front of Pavilion V as early as next Wednesday, June 20th. This activity is weather-dependent and is anticipated to take up to two weeks. Work will be performed by Rivanna Archaeological Services in accordance with and permitted by the Virginia Department of Historic Resources. This area may contain significant archaeological information pertaining to the construction of the Lawn terraces, early University water systems, and possible early pathways on the Lawn. Archaeological monitoring will occur during construction at the Pavilion IX location.

Construction Schedule:

Construction is scheduled to take place from July 5 – October 26

Please see the diagram below to view the project locations.

Details:

The Design was completed by Rhodeside & Harwell, Landscape Architects

The Construction will be executed by UVA’s Project Services Department
