CONSTRUCTION PROJECT ALERT
Memorial Gymnasium Air Conditioning Project
Enabling Project: Chilled Water Connection

Project Background: In order to provide a more comfortable gymnasium space, UVA Athletics has funded a project to install air conditioning into Memorial Gymnasium. The project will provide a climate controlled space for Varsity Volleyball, Varsity Wrestling, numerous Intermural Recreational activities, Kinesiology classes, and general student exercise use. Whereas the project will not fully condition the entire building, it will provide a large climate controlled space for multiple University events.

Construction Status: This project will be completed in two phases.

• Phase 1: Chilled Water Connection – Spring 2018
• Phase 2: Air Conditioning Installation – Summer 2018

Imminent Construction Activity: Phase 1: Chilled Water Connection

• Schedule: 02/26 – 04/20 (8 weeks)
• Work performed by UVA Utilities Department
• Scope: Connection to CW lines located north of the Newcomb Chiller Plant. Open trench pipe run to east wall of Memorial Gymnasium at basement level. General construction noise can be expected to include heavy equipment, back-up alarms, and typical utility tradesmen jibber-jabber.

• **Mem Gym Alley CLOSED to parking 02/26 – 03/16 (3 weeks).** Permit holders will be permitted to park in Central Grounds Garage.

• Core-drilling through basement concrete wall scheduled for Friday, March 9th. This activity will be loud and possibly reverberate throughout the building.

• Please see diagram below for further details.
