CONSTRUCTION PROJECT ALERT  
Pavilion VI Chilled Water Line Install

**Items of Interest:** Sidewalk Closure Extension

**Project Background:** UVA Energy and Utilities is bringing central chilled water from an existing line in front of the East Range to Pavilion VI. The line is being directionally drilled, and will require a receiving pit to tie in to the existing utility at the top of the stair between Hospital Drive and East Range Road. This work will take place from August 1-24, 2018.

**Imminent Construction Activity:** Directional drilling planned for the week of August 6 was delayed due to staffing issues caused by emergency security measures for August 10-12 activities. The work will continue August 20-24. The East Range temporary access road and stair connecting the East Range to Hospital Drive will remain closed through this time.

**Impacted Area:**
