CONSTRUCTION ALERT

CONCERNING IMMINENT CONSTRUCTION ACTIVITY

Brandon Avenue Green Street & Utilities Project Update

ITEMS OF INTEREST:

Our contractors will be installing an electrical ductbank across Monroe Lane, just south of the Crispell/Monroe Lane intersection, starting on March 30, 2019. This work will be occurring during the day and is expected to last approximately one week. The contractor will keep one lane accessible at all times in order to maintain access to Endoscopy and the M-9 parking lot. Flaggers will be in place to help direct traffic.

**The rainy day/inclement weather alternative start date for this work will be April 6, 2019**

BACKGROUND:

In support of the redevelopment of the Brandon Avenue district, this project will install a new central UVA utilities corridor that will serve the district, and will include new electrical ductbank lines, domestic waterlines, chilled waterlines, low-temperature hot waterlines, telecom, and sanitary sewer and stormwater services. This project will also construct a new “Green Street” that will include a bioretention median in the center of the new one-way street around the district. In addition, the southern end of Monroe Lane will be realigned to a straighter road alignment that will allow for better access to the UVA Endoscopy building and also allow for more green space near the South Pond.
