DATE: November 15, 2019          CONSTRUCTION ALERT          Alert No. 34

CONCERNING IMMINENT CONSTRUCTION ACTIVITY

Brandon Avenue Green Street & Utilities Project Update

ITEMS OF INTEREST:

Wednesday (11/20), Thursday (11/21), and Friday (11/22) nights, between 7pm and 5am, contractors will be installing a new underground telecom line from the area in front of Shea House across JPA. The installation of this line will occur in three phases, with one lane of traffic being closed during each phase. Please see the new traffic patterns for each phase of this work below. Flaggers and signage will be in place to help direct traffic through the area during this time.

See below for traffic plans associated with each item.

BACKGROUND:

In support of the redevelopment of the Brandon Avenue district, this project will install a new central UVA utilities corridor that will serve the district, and will include new electrical ductbank lines, domestic waterlines, chilled waterlines, low-temperature hot waterlines, telecom, and sanitary sewer and stormwater services. This project will also construct a new “Green Street” that will include a bioretention median in the center of the new one-way street around the district. In addition, the southern end of Monroe Lane will be realigned to a straighter road alignment that will allow for better access to the UVA Endoscopy building and also allow for more green space near the South Pond.
