CONSTRUCTION PROJECT ALERT
East Range Stormwater Management Phase II

Items of Interest: Closure of Lile Alley, Key Alley, and Green Alley; Evening work

Imminent Construction Activity:
Faulconer Construction plans to install an Addastone top coat to Lile, Key, and Green Alleys between July 15-21. No vehicular traffic will be allowed in the area of Lile Alley, Green Alley, and Key Alley between 6pm July 15 and 7am July 22. Vehicles parked in Green, Key, or Lile Alleys at 6pm July 15 will be towed.

Evening Work:
Due to temperature sensitivity of the Addastone product, this work must be done in evening hours. Crews will begin work at 7pm and may work as late as 4am. The work is quiet hand work requiring only a small residential generator to power work lights after dark. The work crew will attempt to complete work near occupied residences earlier in the evening. All possible measures will be taken to ensure crews work quietly and do not disturb residents.

Pedestrian and vehicle access will be prohibited in Lile, Key and Green Alleys during this period. The Addastone material must cure properly before any traffic is allowed on the paved road surfaces. Otherwise, the finish will be damaged. Barriers will be installed at all entrance points to the area to prevent traffic.

Parking relocations will be coordinated directly with permit holders by P&T.

This work is weather dependent, as well as dependent of the schedule of the asphalt sub-contractor. We will make all possible efforts to accomplish paving as scheduled. Should work be delayed, residents will be alerted immediately and paving will be rescheduled.

See attached site plan for additional details and revised schedule.
