CONSTRUCTION ALERT
Main Library Renovation

ITEMS OF INTEREST:
Extensive excavation and hauling of dirt on the south side of the Main Library. Trucks entering and exiting at the major crosswalk on McCormick Road near the Chapel, as shown in the photo below, work will start approximately September 20, 2021, and finish by November 24, 2021.

The road and the sidewalk will not be closed. However, several large dump trucks will enter and exit the site every day. The contractor will use flaggers to safely get trucks across the sidewalk, the crosswalk, and onto McCormick Road. No trucks will enter or exit during class change.

BACKGROUND:
The Project is repairing leaks on the exterior walls at Level 3 and Level 2 on the east and west side. Due to the proximity of Harrison Small Special Collections, mature trees, and the Aviator Statue there is nowhere to stockpile the spoils. The leaks have been problematic for a long time causing extensive damage. The site is difficult to access and requires extensive shoring. The renovation and the closure of the library is the opportunity to repair the leaks.
