CONSTRUCTION PROJECT ALERT
Bayly Building Renovation

Project Background: The Bayly Building is home to the Fralin Museum of Art at The University of Virginia. This project will replace the roof of the main building and two annexes. The original roof was a slate roof with a central glass skylight. The current all-slate roof will be replaced with a combination slate and standing seam metal roof, with the metal roof evoking the original skylight design. This project will also replace components of the HVAC system to provide better climate control for the museum setting.

Imminent Construction Activity:
- Scaffold Removal
  - Removal of rear section – Thursday & Friday, March 11th & 12th
  - Removal of remaining scaffolding begins Monday, March 22nd. This is expected to take 1 week, but is weather dependant.

Construction Impacts
- There will be no parking in the Bayly courtyard to allow for scaffold removal.
- There will be temporary pedestrian restrictions. Please follow the directions of on-site personnel to ensure pedestrian safety.
- Please see the diagram below for more information.
