Date: December 06, 2022

Information Alert

BACKGROUND:

- E&U will further increase the redundancy of the water supply. One spot improvement in the vicinity of Alderman and Whitehead Road intersection will be required. There is an 8-inch constriction in what otherwise is a 12” main loop. This waterline will be replaced with a 12-inch main to maintain a higher level of redundant service to the system through the Gooch-Dillard area.

ITEMS OF INTEREST:

- Traffic will be impacted on Alderman Road for two work phases. Phase 1 will be December 19-23, 2022.
- Phase 1 will include the installation of a 12” gate valve. This will require a domestic water outage on December 21, 2022, that will affect Fitzhugh and Dunglison residence halls.
- Upon Phase 1’s completion, the affected work zone will be reopened through traffic for the holiday.
- Phase 2 will commence on January 2, 2023, with a substantial completion date of January 13, 2023.
- During work hours traffic will be limited to 1 lane with Flagger stations on Alderman and Whitehead Road.
- Steel Plates will be in place during non-work hours.
- Pedestrian traffic will be maintained.
