CONSTRUCTION ALERT
Disharoon Park Erosion Repairs

ITEMS OF INTEREST:

Between Monday February 14th and Monday February 21st, the three parking spaces located on the southeastern side of the parking lot at Disharoon Park will need to be closed for construction work. Faulconer Construction Company will be performing some erosion repair work on the hillside between the parking lot and the railroad tracks.

Faulconer will also periodically need to close one lane of the roadway adjacent to the BMP at the plaza to stage a dump truck. They will have cones marking off the area, and will be prepared to assist with traffic around the truck as needed.

Construction work will start on Monday February 14th and is anticipated to be complete on Monday February 21st, weather depending.

Please see the plan below showing the extents of the work.

BACKGROUND:

There has been a significant amount of erosion on the hillside at the southeastern corner of the Disharoon Parking Lot. Corrective work to address the erosion on the hillside, and some corrective work at the BMP adjacent to the plaza will need to occur to solve this issue.
