CONSTRUCTION ALERT

FONTAINE RESEARCH PARK
PARKING GARAGE PROJECT

ITEMS OF INTEREST:

• In support of the Fontaine Research Park Parking Garage Project, Schnabel Engineering will be drilling additional borings to ascertain additional rock information to further inform the design.

• U9 parking spaces will be impacted as shown in the attached exhibit. P&T will be supporting this effort by providing a general notification to U9 permit holders and placing traffic cones / barriers in the ten (10) marked areas to ensure the driller has access to take the bore locations.

• The driller will begin work on Monday, 11/27, and will be on site through Wednesday, 11/29. This activity is scheduled for 7:00am - 5:00pm.

BACKGROUND:

• The project consists of constructing a new parking garage adjacent to 400 Ray C Hunt to meet the parking needs of the Fontaine Research Park. The new parking garage will be seven (7) levels including a partially below grade level with a speed ramp for the approximately 1,250 parking spaces. The construction completion is expected to be Fall 2025.
