CONSTRUCTION ALERT

Low Temperature Hot Water (LTHW) Phase 3C
11/15/2023

BACKGROUND:
• The Low Temperature Hot Water (LTHW) Conversion Project will be removing steam service from several buildings and providing LTHW as the means of heat.
• Steam and condensate piping in tunnels located east of Brown College down to Emmet Street and along Emmet Street toward Mem Gym has been removed and replaced with LTHW utility piping.
• A section of tunnel top was removed in the parking area at the end of Newcomb Road South in front of Holmes House and Tucker House at Brown College. The tunnel top was replaced late this past summer and road plates have been covering the top to allow for vehicular traffic and parking.

ITEMS OF INTEREST:
• The project team will be removing the road plates at 7 A.M. Tuesday morning November 21 so the area can be paved. Paving will take place as soon as the plates are clear.
• The area will remain barricaded off until the pavement has cured, and striping is complete.
• The area will be opened back up by 5 P.M. Wednesday afternoon November 22.
