CONSTRUCTION ALERT

Low Temperature Hot Water (LTHW) Phase 3C
8/28/2023 – 11/27/2023

BACKGROUND:
- The Low Temperature Hot Water (LTHW) Conversion Project will be removing steam service from several buildings and providing LTHW as the means of heat.
- Much of the steam and condensate piping in tunnels running from just east of Brown College to Emmet Street and from Emmet Street to Mem Gym has been removed and is being replaced with LTHW piping.

ITEMS OF INTEREST:
- We will be mobilizing Emmet Street to the south of the Newcomb Garage entrance on August 28, 2023. This work will involve moving the concrete barricades that are currently in place out into Emmet Street North and shifting north bound traffic into the turning lane for Contemplative Commons.
- The bus stop will remain at its temporary location for the project, just north of the Newcomb Garage entrance.
- Additional traffic management and pedestrian routes will continue to be implemented heading north up Emmet Street.
- Work to install new piping in the work areas will continue into the Fall of 2023.
- Coordination with the Contemplative Commons project will be ongoing throughout this work. They will be providing support to assist with managing pedestrian traffic at their site entrance.
- All traffic management and fencing will be consolidated and removed from the roadway during home football games.
