CONSTRUCTION ALERT
The Mews Renovation

ITEMS OF INTEREST:
Electrical conduit installation underneath West Lawn Rooms #5-#33, including the basements of Pavilion III, Pavilion V, & Pavilion VII. From 10/23 to 12/1, UVA FM Electricians will be installing electrical pathways to The Mews. Working hours are 8AM-3:30PM. There should be no disruption of power, however there will be some noise from underneath the student rooms and in the Pavilion basements. The work will start at Pavilion III and progress down the Lawn to Pavilion VII.

Please see the map on the next page for details.

REASON FOR WORK:
The existing electrical service was inadequate and is being brought up to current electrical code.

PROJECT BACKGROUND: The Mews originally functioned as a one-and-a-half-story kitchen quarter for Pavilion III. Subsequent 19th & early 20th century renovations resulted in the building’s current status as two separate apartments in the now two-story structure. The renovation’s scope includes new connections to the University’s utility services, restores historic finishes including the masonry envelope, improves ADA accessibility and other code compliant conditions, a select roof replacement, and full kitchen & bath replacements.

ISSUED BY:
Henry Hull, Project Manager, c. 434-270-1574, hmh5xj@virginia.edu

See next page for illustration.
MAPS OF AFFECTED AREAS:

New electrical feed from The Mews to Pavilion VII routed through Lawn Room crawlspaces & Pavilion basements
