Alert No. 1

CONSTRUCTION ALERT

Amphitheatre Structural Repairs

ITEMS OF INTEREST:

- To provide support for the building during construction, shoring will be reconfigured December 1-December 5.
- Remaining construction activities will begin the following week, including closing of the eastern half of the stage.
- Construction should be completed in March of 2026.

EXIT & SIDEWALK ACCESSIBILITY

- ☐ Work blocks existing building exits, and was reviewed with OUBO prior to blockage.
- ☐ Work blocks existing sidewalks, and was reviewed with OUBO prior to blockage.
- ☒ No impact to existing building exits and sidewalks.

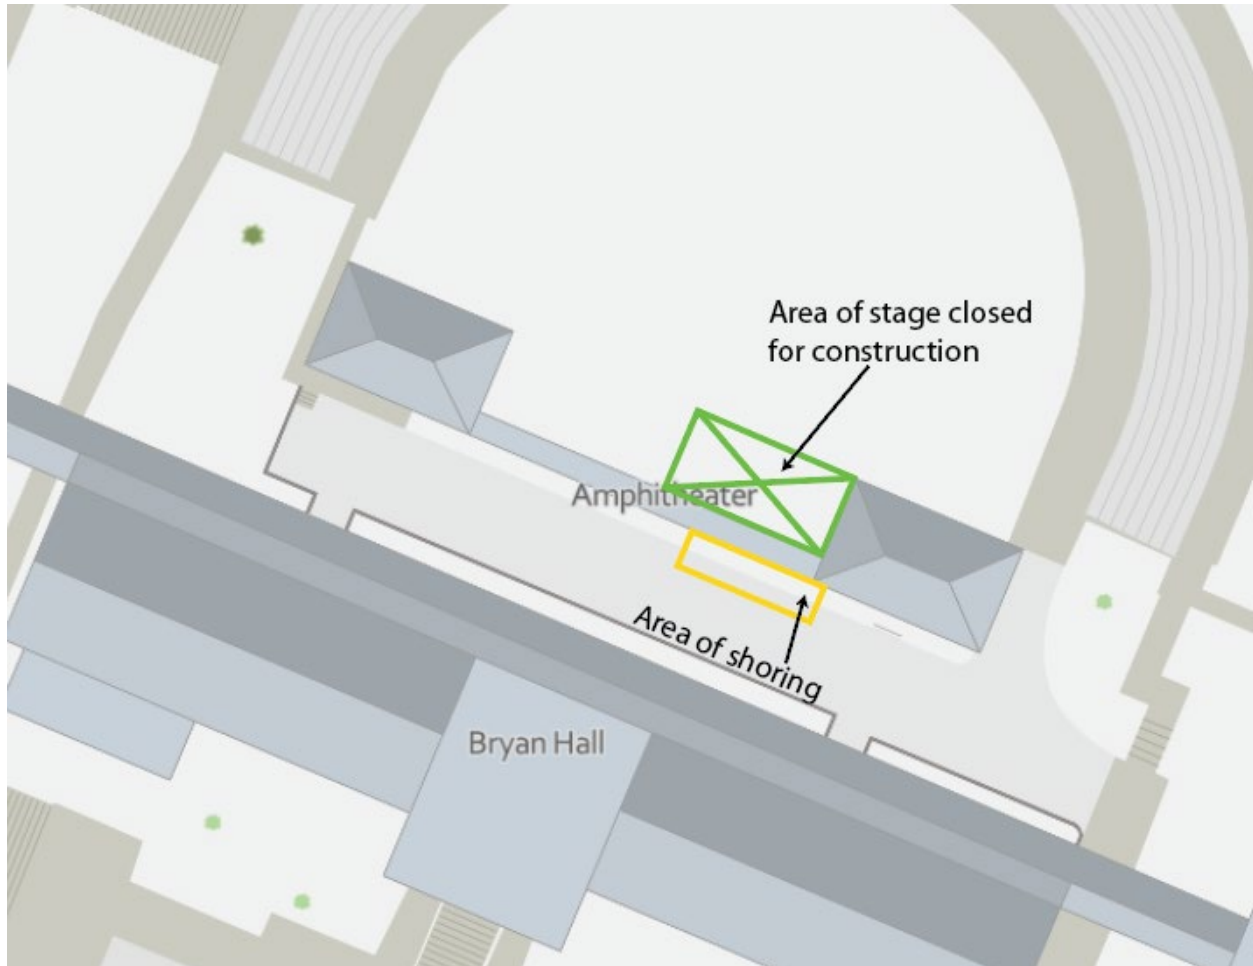

BACKGROUND:

- The amphitheater was constructed in 1920, designed by Fiske Kimball, and has been used for many events and gatherings over the years.
- After a previous project to remove a failing modern coating on the amphitheater, it was noted that a section of the amphitheater needed repairs to its structural system. Shoring was installed as a precautionary measure and will be maintained until the structural repair is completed.
