Facilities Management

**REPORT ON THE CONDITION
OF
UNIVERSITY FACILITIES**

For the Fiscal Year Ending June 30, 2021

Electronic copy available at:
<https://www.fm.virginia.edu/docs/conditionReport/2020-21FacilitiesConditionReport.pdf>

2020-2021 Facilities Condition Report

Page

2.....Facilities Inventory

4.....Condition of Agency 207 E&G Facilities

6.....Resources for Maintenance and Repair of Agency 207 E&G Facilities

Appendices

A..... Agency 207 Educational and General (E&G) Data

B..... Agency 207 Auxiliary Data

C..... Agency 209 Data

D..... Agency 246 University of Virginia's College at Wise Data

**E..... Annual Report on the Board of Visitors Deferred Maintenance Initiative
(includes before and after photos of maintenance projects)**

FACILITIES INVENTORY

The University of Virginia (UVA) facilities portfolio includes 556 buildings and corresponding infrastructure, encompassing over eighteen million gross square feet of building space, with a conservatively estimated replacement value of \$5.5 billion. The facilities portfolio constitutes a significant portion of the total assets held by the University. This report offers a maintenance condition synopsis for the E&G assets and a discussion of the on-going reinvestment needed to assure their continued usefulness.

For administrative and budget purposes, the University includes three State agencies, Agency 207 University of Virginia, Agency 209 University of Virginia Medical Center, and Agency 246 Wise. Agency 207 is subdivided into two operational categories: Educational and General (E&G) and Auxiliary. The following items should be considered when discussing these categories:

1. Agency 207 E&G refers to the academic division of the University that is partially supported by general funds allocated by the Commonwealth. This includes the Medical School, Nursing School, and Health Science Center Library.
2. Agency 207 Auxiliary spaces are assigned to organizations that are self-supporting, such as the Housing and Athletic departments. These organizations receive no general fund support.
3. Agency 209 is the patient care agency, named UVA Health.

The UVA Facilities Management (FM) staff prepares this report on an annual basis. The FM staff has direct access to the inspection and cost data for Agency 207 E&G facilities. The facilities data for Agency 246 has been provided by the college's administration and can be found in Appendix D.

Table 1 below shows the number of buildings, gross square feet, and replacement value of the buildings and infrastructure maintained by Agency 207 and Agency 209.

Table 1- University of Virginia Facilities and Infrastructure Summary

	Number of Buildings*	Gross Square Feet**	Replacement Value***
Agency 207 E&G	303	7,704,848	\$3,086,646,998
Agency 207 Auxiliary	214	6,349,201	\$1,341,737,278
Agency 209	39	4,228,275	\$1,086,629,555
Total	556	18,282,324	\$5,515,013,831

* Some buildings are shared by more than one agency. For the purposes of this report, each building is counted once and each building is assigned to the category that has the majority of space in that building.

** Calculated based on the percentage of financial responsibility in each building.

*** Calculated based on the percentage of financial responsibility in each building or infrastructure component.

Replacement Value

The term “replacement value” has a long and varied history of use in the type of analysis contained in this report. A logical assumption is that “replacement value” means the total cost to replace a building if it has to be completely rebuilt. However, for this report, when “replacement value” is used, it refers to *the value of building components that an organization is obligated to maintain*. It may be clearer to think of this as the asset’s total maintenance value. For newly constructed and renovated facilities, replacement value refers to a portion of the total amount that would be needed to actually build or replace the facility, specifically the construction cost. Replacement value does not include additional costs for line items such as architectural fees, project management fees, and furnishings; nor does it include the cost of adapting a building to changing occupant needs, building codes, or fire and life safety requirements.

Infrastructure

Facilities Management maintains many assets that are not buildings, such as sidewalks, roads, curbs, steam tunnels, sewer and water lines, buried electrical lines, and light poles. In fact, the infrastructure assets account for \$895,080,948 of the total replacement value shown in Table 1 with a proportion of 59% 207 E&G, 22% 207 AUX, and 19% 209.

Age

Generally speaking, as the age of a building or infrastructure component increases, so does the maintenance demand. Although some components of a building can last for many decades, such as the foundation, framing, and exterior walls; the average life span of most electrical, mechanical, and roofing systems is between twenty-five and thirty-five years.

Of the 303 buildings assigned to Agency 207 E&G, 224 (73%) are more than 30 years old. For Agency 207 E&G facilities, the average age is 76 years, and the median age is 61 years.

CONDITION OF AGENCY 207 E&G FACILITIES

Maintenance Backlog

Facilities Management gathers information about the maintenance needs of the Agency 207 E&G buildings by performing facility condition assessments. The goal is to inspect E&G buildings every four years. The assessments result in a number of immediate repairs. They also document repairs that are needed at the time of the inspection but cannot be undertaken at that time due to funding or other constraints. These deferred maintenance items become the maintenance backlog for that building. It is important to distinguish between what a facility may need in terms of maintenance, and what it may need in terms of adaptation or modernization. The maintenance backlog represents the estimated amount of money needed to restore deteriorating components to their original operating condition. In many cases, restoring components to their original operating condition will fall short of today's standards for function and/or regulatory compliance; therefore, the cost to fully renovate or modernize a building is usually many times greater than the estimated deferred maintenance backlog.

Cost Estimates

The maintenance backlog for a building represents the total cost to repair the maintenance deficiencies documented in the facility condition assessment. Many major repairs cannot be accurately estimated until considerable money is spent on research and design. Money is not invested in this level of estimating unless a project is funded for accomplishment. The estimated costs that make up the backlog are order of magnitude figures, intended to be sufficiently accurate in reflecting the magnitude of the repairs needed for a particular building.

The Facility Condition Index

The Facility Condition Index (FCI) is an effective and widely accepted measure used to indicate the relative condition of a building. It is calculated by dividing the value of the maintenance backlog in a building by the replacement value of the building and showing the result as a percentage. For example, a building with a replacement value of \$5,000,000 that contains a \$100,000 maintenance backlog has an FCI of two percent. By comparison, a building with a replacement value of \$1,000,000 that also has a \$100,000 backlog is in relatively worse condition. The FCI for that building is 10 percent. Recognized industry benchmarks consider a building with a FCI of 5 percent or less to be good condition.

Over the past fiscal year, many building system renewal projects were completed which slowed the growth of the maintenance backlog. Some examples of these projects include the Bayly Building and Aurbach roof replacement, Maury Hall foundation waterproofing, the Heat Plant's switchgear replacement, and the Chapel exterior masonry renewal. Additional maintenance renewal projects include the Pinn Hall Addition roof replacement, Memorial Gym skylight replacement, and Zehmer Hall bathroom renovations.

Table 2 – 2020-2021 E&G FCI%

E&G Total Replacement Value*	E&G Total Maintenance Backlog**	E&G Overall FCI***	E&G Buildings with FCI of 5% or Higher
\$3,086,646,998	\$155,873,938	5.0%	27%

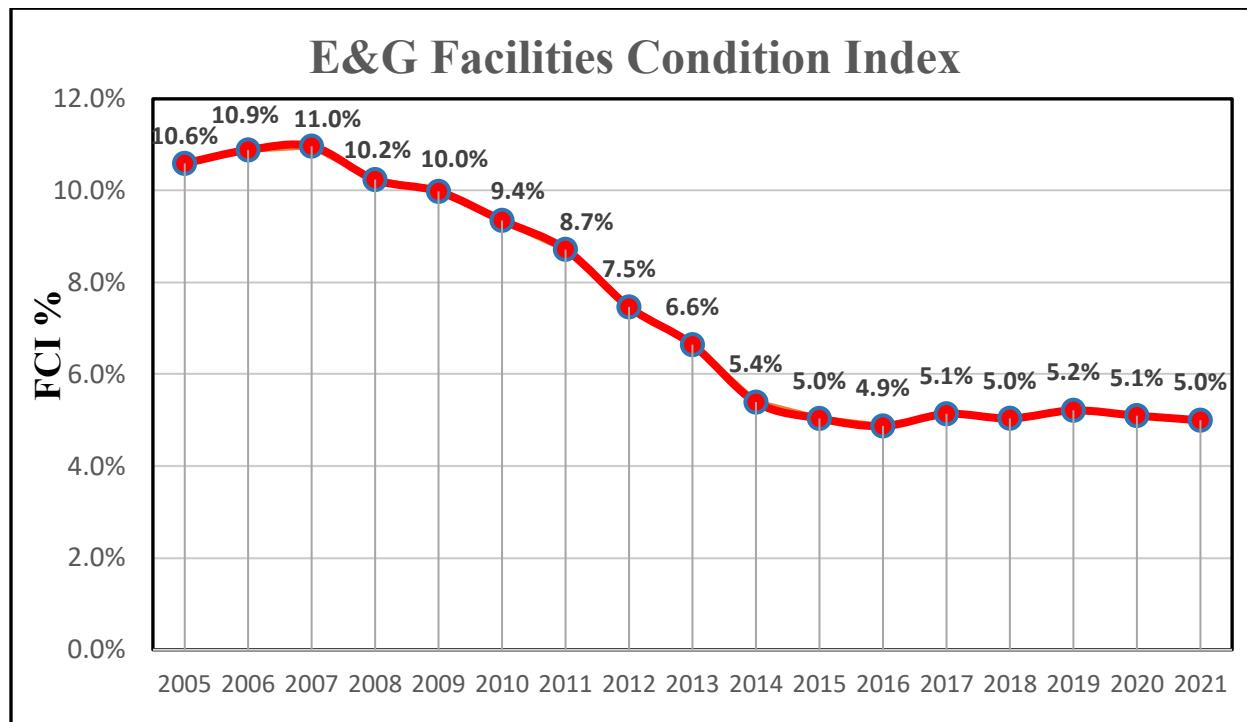

* Calculated as the total value of each building (or infrastructure component) multiplied by the percent of financial responsibilities for Agency 207 E&G.

** Calculated as the total cost of all deficiencies in each building (or infrastructure component) multiplied by the percent financial responsibilities for Agency 207 E&G.

*** Calculated by dividing the value of the deficiencies in the Maintenance Backlog by the replacement value.

The FCI achievement since 2005 would not have been possible without the transformational support, planning, and funding commitments of the BOV. Through this support, along with the investments made in maintenance operations, maintenance reserve and major capital renewals, the Deferred Maintenance Program achieved its goal of a 5 percent FCI, as of June 30, 2015. The program continues to maintain the University's facilities in good condition through the combination of maintenance reinvestment and whole building capital renewals. This year the FCI decreased to 5%. Several large-scale projects assisted in this decrease in backlog. Two examples were the Pinn Hall exterior masonry renewal and the Gilmer renovation project. These projects address the maintenance deficiencies as well as adapting the buildings to meet current University programs and building codes.

—The following chart illustrates the progress made by the Deferred Maintenance Program in regard to achieving the goal of a 5 percent FCI by fiscal year 2015.

RESOURCES FOR MAINTENANCE AND REPAIR OF AGENCY 207 E&G FACILITIES

This report captures the financial resources for the maintenance of the University's E&G facilities from three principal sources: Maintenance Operating Budget, the Board of Visitors (BOV), and Maintenance Reserve funding. Additionally, the correction of maintenance items is accomplished through larger projects funded by capital outlay or private fund sources. Though not captured here, these complementary resources are essential to maintaining a 5 percent FCI.

Maintenance Operating Budget Expenditures

Funding for preventive and routine maintenance in support of Agency 207 E&G is provided through the University's annual operating budget. Funding for maintenance of the utility infrastructure is provided by a component of utilities rates charged to each user of these services. Resources expended through the maintenance operating budget for Agency 207 E&G for the 2020-2021 fiscal year totaled \$25,885,661. This figure includes operating maintenance funding for both Law and Darden.

Board of Visitors

Beginning with the 2005-2006 fiscal year, the University's Board of Visitors made available a special allocation of funds for deferred maintenance projects. When the initiative began, the plan was to incrementally increase annual funding to a budgeted target maintenance reinvestment rate of 2%. Further detail on the Maintenance Reinvestment Rate is found on the follow page. During the last fiscal year \$23,841,217 was expended from the BOV deferred maintenance account.

Maintenance Reserve Funding

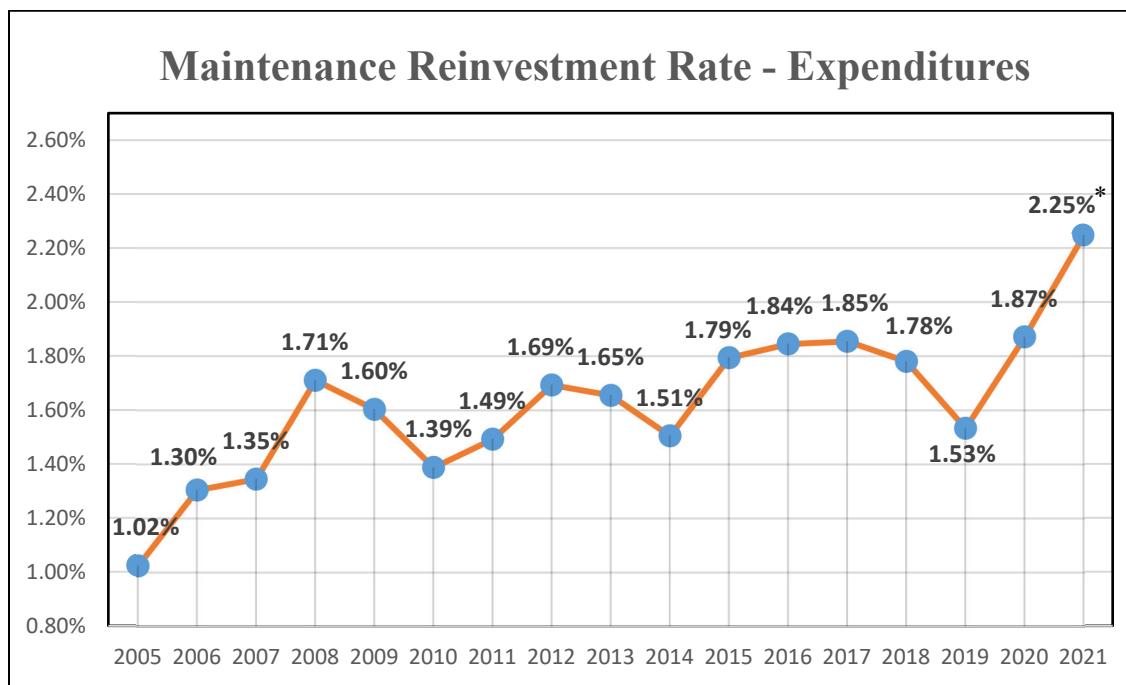

Maintenance Reserve is a component of the Commonwealth's capital outlay budget appropriated by the General Assembly each biennium. Initiated in the 1982-84 biennium, Maintenance Reserve acknowledges the need of an on-going financial commitment to address deferred maintenance needs within state facilities. Maintenance Reserve is intended to fund major repairs costing between \$25,000 and \$2,000,000 each. A total of \$19,702,382 was spent from this account in the last fiscal year. Maintenance Reserve funds address the deterioration of building systems, thus extending the useful life of a facility. Today, Maintenance Reserve funds, combined with capital renewals, play a crucial role in the management and reduction of UVa's deferred maintenance backlog. Note that the State does not allocate Maintenance Reserve funds to Agency 209, Agency 207 Auxiliaries, and a small number of Agency 207 E&G facilities.

Maintenance Reinvestment Rate

The ratio of the building maintenance expenditures to the total replacement value is known as the maintenance reinvestment rate. The total amount spent on building maintenance can be calculated by combining the amounts spent from the operating budget, the BOV funds, and Maintenance Reserve. For 2020–2021, the figure for Agency 207 E&G was \$69,429,260.

These expenditures represented 2.25 percent of the replacement value of the E&G buildings and infrastructure. Various authorities cite a range between 1.5 percent and 4 percent as the reinvestment rate necessary to slow the growth of deferred maintenance. Taking into consideration the age of many of the University's buildings and the substantial amount of deferred maintenance already accumulated, the BOV established a goal to achieve a reinvestment rate of 2 percent. In addition to the reinvestment rate, Agency 207 E&G funds new facility maintenance at 2 percent of the building's construction cost.

The following chart illustrates the progress made towards reaching the goal of a 2% Maintenance Reinvestment Rate (MRR) as represented by total expenditures. This MRR differs from the one documented in BOV update on the Deferred Maintenance initiative, appendix E, which shows the total budgeted amount allocated to the Deferred Maintenance program. The chart below shows what was expended since the BOV initiative in 2005.

* In FY 2019, the program was approaching several maintenance projects of capital magnitude. The FY 2019 dip in expenditures set up the expenditure spike in FY 2021 as the capital projects hit the financial records. If cashflow were more even, FY 2019, FY 2020, and FY 2021 would be closer to 1.88% MRR

Capital Budget

Many older buildings need considerable renovation work to make them compatible with contemporary building and life safety codes, as well as current research and teaching standards. In addition to the renovations done during these projects, many long-standing maintenance and repair needs are also corrected in the course of the work. For this reason, capital renewal projects are a valuable resource to fund the correction of maintenance deficiencies in existing buildings.

Gift and Grant Funding

Gift funding has been a significant source of financial support for the restoration and preservation of the University's Jeffersonian buildings and grounds. Resources have primarily been developed through the activities of the Jeffersonian Restoration Design Committee.

Summary

In 2005-06, the Board of Visitors embarked on a ten-year plan to reduce the deferred maintenance backlog of E&G facilities and the corresponding FCI to 5 percent or less. The Board also took steps to establish adequate annual maintenance funding to limit the accumulation of deferred maintenance. Today the FCI is 5.0 percent, which is in the "good" category by industry standards. The FCI shows a noteworthy improvement since 2005-06, when the Report on the Condition of University Facilities reported the E&G FCI to be 10.9 percent. The University has made steady progress in its investments through maintenance operations, Maintenance Reserve, and BOV funding that have improved the maintenance reinvestment rate, a rate that was 1.02 percent in 2005-06 and is now 2.25 percent measured in expenditures.

Appendix E

Annual Report on the Board of Visitors Deferred Maintenance Initiative

This report details the continued progress made since the inception of the Deferred Maintenance (DM) initiative approved by the Board of Visitors in 2005. The focus of this document includes the progress to curtail the overall maintenance backlog, the budgeted Maintenance Reinvestment Rate (MRR), and details of recently completed DM projects and accomplishments.

**University of Virginia
Status Report on the Plan to Address Deferred Maintenance
FY 2020-2021**

Executive Summary

The University of Virginia's facilities portfolio includes 556 buildings and related infrastructure, encompassing over eighteen million gross square feet of building space, with a conservatively estimated replacement value of \$5.5 billion. The facilities portfolio constitutes a significant portion of the total assets held by the University and should be appropriately maintained.

In December 2004, after hearing a presentation about the University's deferred maintenance backlog, the Board of Visitors embarked on a long-term plan to accomplish two objectives:

- (1) Reduce the deferred maintenance backlog to a reasonable level by 2015, with a target facility condition index (FCI) of 5 percent or less. At the time, the FCI was 10.6 percent.
- (2) Establish adequate annual maintenance funding to prevent the further accumulation of deferred maintenance, by increasing the then current budgeted 1.2 percent reinvestment rate to a 2.0 percent annual reinvestment rate.

The BOV initiative resulted in noteworthy progress with the FCI improving to 5% in FY 2015 and the MRR rising to 2% in FY 2019. Investments through maintenance operations, maintenance reserve and major capital renewals have reduced the FCI to 5.0 percent and improved the MRR to 2% as of June 30, 2021.

The auxiliaries, Medical Center, and the College at Wise are continuing to address their respective backlogs. The Medical Center, Facilities Planning and Construction, and Health System Physical Plant have developed a building-by-building and system-by-system evaluation of the infrastructure of all Medical Center facilities. The Medical Center Operating Board and the Buildings & Grounds Committee have approved this program of infrastructure enhancement over a period of 10-15 years based on need and available resources from the Medical Center's annual capital expenditure budget. The College at Wise has a facility condition index of 2.7 percent and has a current maintenance reinvestment rate of 0.8 percent. This is the last reported MRR for Wise. This low FCI percentage is largely due to newer construction and capital renewal of existing buildings.

Deferred Maintenance Backlog

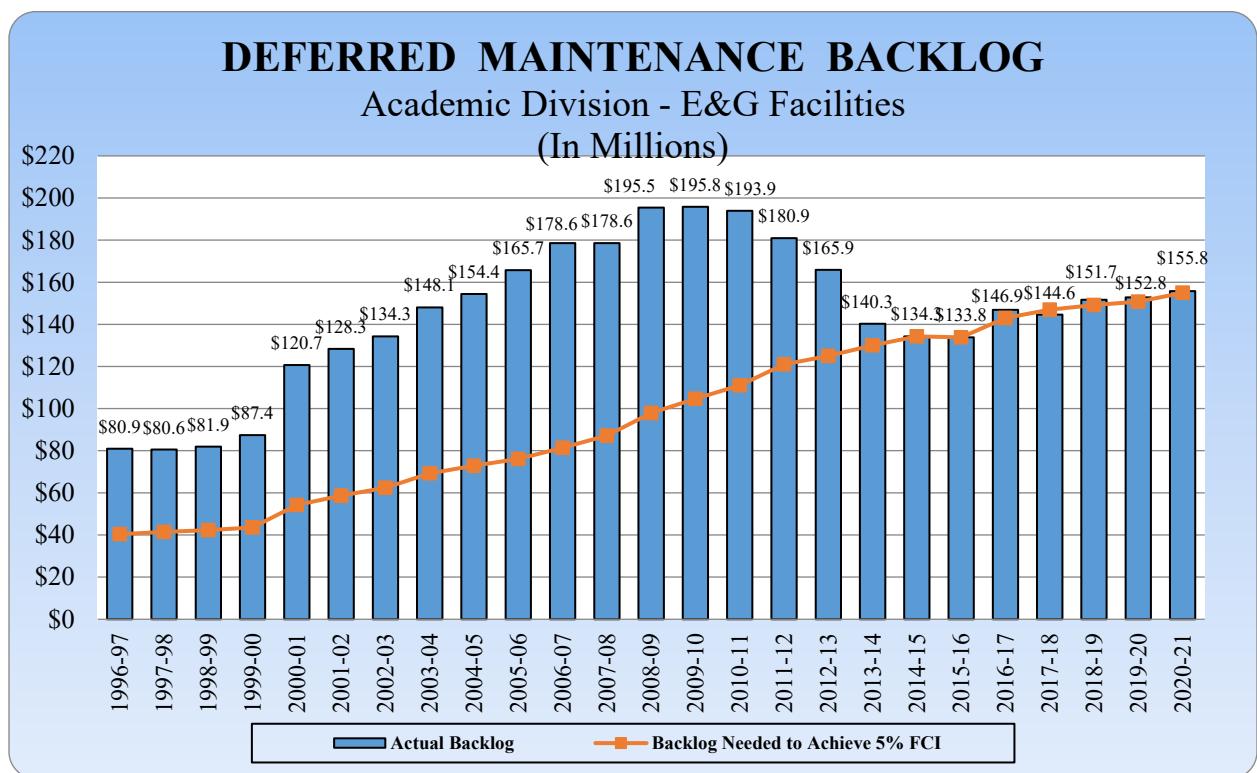

Overview

Facilities Management determines the maintenance needs of the University's E&G buildings by performing facility condition assessments. The goal is to inspect E&G buildings once every four years. The assessments result in a number of immediate repairs. They also document repairs that are needed but cannot be undertaken at the time of inspection due to funding constraints, occupancy requirements, or other factors. These deferred maintenance items become the maintenance backlog for that building.

It is important to distinguish between what a facility may need in terms of maintenance, and what it may need in terms of adaptation or modernization. The maintenance backlog represents the amount of money needed to restore deteriorated components to their original operating condition. In many cases, restoring components to their original operating condition will fall short of today's standards for function and/or aesthetics; therefore, the cost to fully renovate or modernize a building is usually many times greater than the cost of the deferred maintenance in the building. The deferred maintenance backlog does not include the cost of deficiencies or improvements to safety, accessibility, and building code issues.

Current Deferred Maintenance Backlog

As of June 30, 2021, the Academic Division E&G deferred maintenance backlog was \$155 million. The graph below shows the backlog trend in relation to the 5 percent FCI goal, which was first achieved in fiscal year 2014-15.

In developing the original deferred maintenance reduction plan, it was recommended that the University undergo a ten-year strategy to improve its E&G facilities from “poor” condition to “good” condition by reducing the facility condition index to 5 percent by 2015. At program inception, predictions were made about the possible replacement value in 2015, which would be impacted by both inflation and new construction. The assumed replacement value was used to project the deferred maintenance backlog reduction target of approximately \$130 million in order to achieve the 5 percent FCI. The incremental cost to improve the condition of E&G buildings and infrastructure to “good” over the ten-year

period was estimated to be \$125 million over the then current level of maintenance funding. The additional cost to address safety, accessibility, and code issues while correcting identified maintenance deficiencies was calculated to be \$31 million over the same ten-year period, bringing the combined required investment to \$156 million. In addition to funds available in the maintenance operations and maintenance reserve budgets, the University will rely on the capital budget to address maintenance items through building renewals such as the recently completed Chemistry renovation, the current Gilmer and Alderman renovations and upcoming Physics building renewal.

Facility Condition Index

Overview

The Facility Condition Index (FCI) is an effective and widely accepted measure used to indicate the relative condition of a building. It is calculated by dividing the value of the maintenance backlog in a building by the replacement value of the building and showing the result as a percentage.

For example, a building with a replacement value of \$5 million that contains a \$100,000 maintenance backlog has an FCI of 2 percent. By comparison, a building with a replacement value of \$600,000 that also has a \$100,000 backlog is in relatively worse condition. The FCI for that building is 17 percent.

Recognized industry benchmarks consider that a facility with an FCI of less than 5 percent is in “good” condition; a facility with an FCI between 5 percent and 10 percent is in “fair” condition; and a facility with an FCI of more than 10 percent is in “poor” condition.

Current FCI

As of June 30, 2021, the Academic Division E&G deferred maintenance backlog is \$155 million, with a total facility replacement value of \$3 billion resulting in an FCI of 5.0 percent.

Maintenance Reinvestment Rate

Overview

The ratio of the building maintenance expenditures to the total replacement value is known as the maintenance reinvestment rate (MRR). Various authorities cite a range of 1.5 percent to 4 percent as the reinvestment rate necessary to prevent the growth of a deferred maintenance backlog. Given the age of many of the University’s buildings and the substantial amount of deferred maintenance already accumulated, a reinvestment rate of at least 2 percent is warranted. To this end, when newly constructed facilities come online, the University allocates 2 percent of the building’s construction cost to the annual maintenance operations budget.

Current MRR

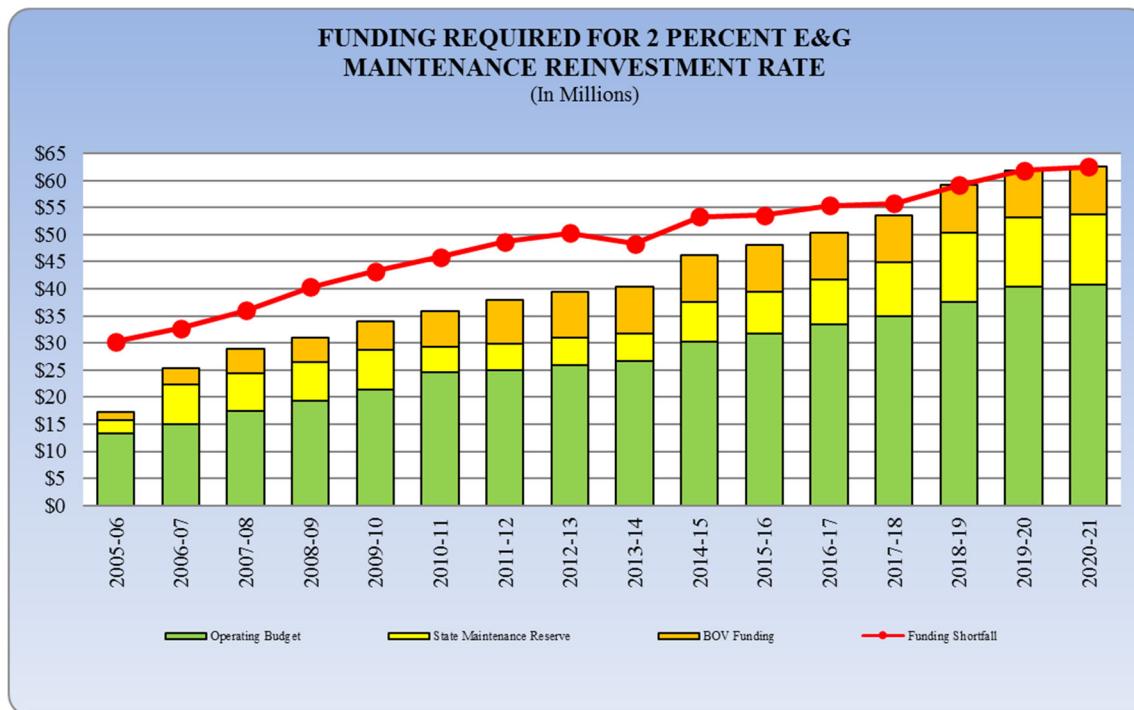

The total amount invested in building maintenance can be calculated by combining the amounts available from the operating budget and from Maintenance Reserve. For 2020–21 we budgeted \$61.8 million for maintenance of E&G facilities or 2 percent of the replacement value of the E&G buildings and infrastructure.

The table below shows the reinvestment rate for the University's E&G buildings since the Board of Visitors initiative began. These figures are based on budgeted funds available for investment in a given year rather than actual expenditures which may vary from year-to-year based on time required to plan and execute the work.

Budgeted Maintenance Reinvestment Rate

Fiscal Year	Budgeted MRR%	Fiscal Year	Budgeted MRR%	Fiscal Year	Budgeted MRR%
2005-06	1.20%	2011-12	1.70%	2017-18	1.92%
2006-07	1.66%	2012-13	1.61%	2018-19	2.05%
2007-08	1.70%	2013-14	1.68%	2019-20	2.04%
2008-09	1.71%	2014-15	1.86%	2020-21	2.00%
2009-10	1.66%	2015-16	1.86%		
2010-11	1.65%	2016-17	1.89%		

The graph below shows the funding trend and annual shortfall relative to a 2 percent funding level over the past fiscal years. Significant progress has occurred since the inception of the Board initiative to achieving a 2 percent MRR.

Accomplishments

Capital Renewal Projects

Whole building renewals are crucial to successfully reduce and maintain the University's overall facility condition index. It is the most efficient method of dealing with the maintenance challenges associated with an older facility. A renewal project corrects maintenance needs while adapting the building to planned use and current codes.

The Gilmer Hall Capital Renewal is in-progress. This renewal project is funded through State appropriations and The College of Arts and Sciences. The renovation will correct many large-scale maintenance deficiencies and improve the programing capabilities. Below are some pictures of the in-progress work.

Gilmer 5th Level – Interior storefront in-progress

Gilmer 5th Level – MEP installation nearing completion

Gilmer Central Roof – New structure for screen wall

Gilmer South Facade – Precast and curtainwall infrastructure in place

Deferred Maintenance Projects

There are approximately \$34 million worth of deferred maintenance projects in progress, including the Pinn Hall exterior renewal (pictured below), Bayly Building roof and HVAC renewal, and Zehmer Hall bathroom renovations.

Pinn Hall – West elevation progress

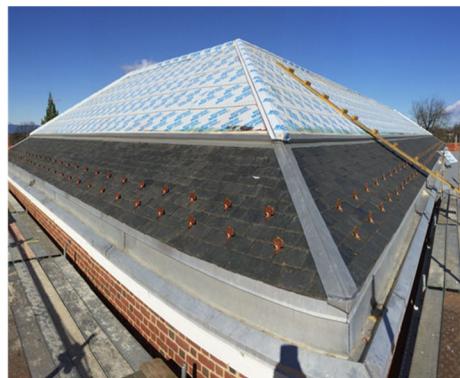

Pinn Hall – West facade brick install

Pinn Hall – North façade step flashing

Bayly Building – Roof before

Bayly Building – Roof in-progress

Bayly Building – Roof completed

Zehmer Hall – First floor bathrooms – before

Zehmer Hall – First floor bathrooms – after

By completing deferred maintenance projects, the maintenance backlog is reduced, and the overall condition of the University's facilities improved. Since 2005-06, thousands of deferred maintenance projects have been completed. A few examples of projects completed in 2020-21 include the Aurbach roof replacement, Memorial Gym skylight replacement, and Maury Hall foundation waterproofing.

Aurbach Roof - Before

Aurbach Roof – In-progress

Aurbach Roof – Finished

Mem Gym Skylight - Before

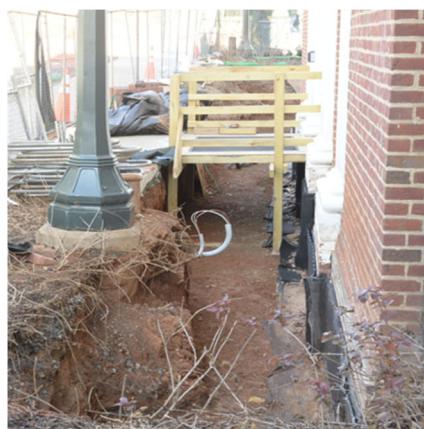

Mem Gym Skylight - Removal

Mem Gym Skylight - After

Maury Hall – Foundation waterproofing in progress

Maury Hall – Foundation waterproofing in progress (maintaining ADA access)

Maury Hall – Foundation waterproofing completed

Deferred Maintenance Contribution to Major Renewal Projects

The Deferred Maintenance program has contributed funding towards addressing deficiencies in several large-scale renovation projects during FY2019-20. The Fiske Kimball bathroom improvements and Michie Buildings MEP system renewal are two examples that are nearing completion. These projects addressed system renewals in buildings that are currently not scheduled for a Capital renewal and ADA code related deficiencies that improve the overall accessibility throughout Grounds.

Fiske Kimball – New first floor ADA Bathroom

Fiske Kimball – New first floor ADA Bathroom

Michie Building – Newly installed suppression infrastructure

Michie Building – Renovated corridor with suppression

Summary

In 2005-06, the Board of Visitors funded a long-term plan to reduce the deferred maintenance backlog of E&G facilities and the corresponding FCI to 5 percent or less. The Board also took steps to establish adequate annual maintenance funding to prevent the further accumulation of deferred maintenance. Today the FCI is 5.0 percent. The FCI has shown a noteworthy improvement since 2004-05, when the Report on the Condition of University Facilities reported the E&G FCI to be 10.6 percent. The University has made significant progress in enhancing its operating maintenance budget toward the targeted two percent reinvestment rate, a rate that began in 2005-06 as 1.2 percent and is now 2 percent. Building systems deteriorate over time and costs rise due to code changes and inflation, therefore it is important that adequate funding support continue to be provided to sustain the achievements of the BOV initiative.
