

Appendix C.2: Daily Inspections

Trenching and Excavation Guide for Daily Inspection of Trenches and Excavations

	Project:	Date:
	Weather:	Trench Depth:
	Soil Type:	Width:
Ty	pe of Protective System:	Length:
	•	
Excavations		
	Excavations and Protective Systems inspected by Competent Person daily, before start of work.	
	Competent Person has authority to remove workers from excavation immediately.	
	Surface encumbrances supported or removed.	
	Spoils, materials, and equipment set back a minimum of 2' from edge of excavation.	
	Barriers provided at all remote excavations, wells, pits, shafts, etc.	
	, ,	
	Warning vests, or other highly visible PPE provided and worn by all employees exposed to vehicular traffic.	
	Employees prohibited from working or walking under suspended loads.	
	excavation.	
	Utilities	
	Valid VA 811 Ticket in place, and on job	site.
	Valid VA 811 Ticket in place, and on job All utilities in and near excavation clear	y marked.
	Valid VA 811 Ticket in place, and on job	y marked.
	Valid VA 811 Ticket in place, and on job All utilities in and near excavation clear No mechanized excavation within 2 fee Area surveyed for potential unmarked u	y marked. t of utility marks. utilities.
	Valid VA 811 Ticket in place, and on job All utilities in and near excavation clear No mechanized excavation within 2 fee Area surveyed for potential unmarked u	y marked. t of utility marks.
	Valid VA 811 Ticket in place, and on job All utilities in and near excavation clear No mechanized excavation within 2 fee Area surveyed for potential unmarked u Underground installations protected, su	y marked. t of utility marks. utilities.
	Valid VA 811 Ticket in place, and on job All utilities in and near excavation clear No mechanized excavation within 2 fee Area surveyed for potential unmarked u Underground installations protected, su Wet Conditions	y marked. t of utility marks. utilities. upported, or removed when excavation is open.
	Valid VA 811 Ticket in place, and on job All utilities in and near excavation clear No mechanized excavation within 2 fee Area surveyed for potential unmarked u Underground installations protected, su Wet Conditions Precautions taken to protect employees	y marked. t of utility marks. utilities. upported, or removed when excavation is open. s from accumulation of water.
	Valid VA 811 Ticket in place, and on job All utilities in and near excavation clear No mechanized excavation within 2 fee Area surveyed for potential unmarked of Underground installations protected, so Wet Conditions Precautions taken to protect employees Water removal equipment monitored by	y marked. t of utility marks. utilities. upported, or removed when excavation is open. s from accumulation of water.
	Valid VA 811 Ticket in place, and on job All utilities in and near excavation clear No mechanized excavation within 2 fee Area surveyed for potential unmarked u Underground installations protected, su Wet Conditions Precautions taken to protect employees Water removal equipment monitored b Surface water controlled or diverted.	y marked. t of utility marks. utilities. upported, or removed when excavation is open. s from accumulation of water.
	Valid VA 811 Ticket in place, and on job All utilities in and near excavation clear No mechanized excavation within 2 fee Area surveyed for potential unmarked of Underground installations protected, so Wet Conditions Precautions taken to protect employees Water removal equipment monitored by	y marked. t of utility marks. utilities. upported, or removed when excavation is open. s from accumulation of water.
	Valid VA 811 Ticket in place, and on job All utilities in and near excavation clear No mechanized excavation within 2 fee Area surveyed for potential unmarked of Underground installations protected, so Wet Conditions Precautions taken to protect employees Water removal equipment monitored by Surface water controlled or diverted. Inspection made after each rainstorm.	y marked. t of utility marks. utilities. upported, or removed when excavation is open. s from accumulation of water.
	Valid VA 811 Ticket in place, and on job All utilities in and near excavation clear No mechanized excavation within 2 fee Area surveyed for potential unmarked u Underground installations protected, su Wet Conditions Precautions taken to protect employees Water removal equipment monitored b Surface water controlled or diverted. Inspection made after each rainstorm. Hazardous Atmosphere	y marked. t of utility marks. utilities. upported, or removed when excavation is open. s from accumulation of water. y Competent Person.
	Valid VA 811 Ticket in place, and on job All utilities in and near excavation clear No mechanized excavation within 2 fee Area surveyed for potential unmarked u Underground installations protected, su Wet Conditions Precautions taken to protect employees Water removal equipment monitored b Surface water controlled or diverted. Inspection made after each rainstorm. Hazardous Atmosphere Atmosphere tested for any excavation research.	y marked. t of utility marks. utilities. upported, or removed when excavation is open. s from accumulation of water. y Competent Person. more than 4 feet, or when there is a possibility of oxygen
	Valid VA 811 Ticket in place, and on job All utilities in and near excavation clear No mechanized excavation within 2 fee Area surveyed for potential unmarked of Underground installations protected, so Wet Conditions Precautions taken to protect employees Water removal equipment monitored be Surface water controlled or diverted. Inspection made after each rainstorm. Hazardous Atmosphere Atmosphere tested for any excavation redeficiency or build-up of hazardous gasses	y marked. t of utility marks. utilities. upported, or removed when excavation is open. s from accumulation of water. y Competent Person. more than 4 feet, or when there is a possibility of oxygen es.
	Valid VA 811 Ticket in place, and on job All utilities in and near excavation clear No mechanized excavation within 2 fee Area surveyed for potential unmarked of Underground installations protected, so Wet Conditions Precautions taken to protect employees Water removal equipment monitored be Surface water controlled or diverted. Inspection made after each rainstorm. Hazardous Atmosphere Atmosphere tested for any excavation of deficiency or build-up of hazardous gase Oxygen content is between 19.5% and 2	y marked. t of utility marks. utilities. upported, or removed when excavation is open. s from accumulation of water. y Competent Person. more than 4 feet, or when there is a possibility of oxygen es. 21%.
	Valid VA 811 Ticket in place, and on job All utilities in and near excavation clear No mechanized excavation within 2 fee Area surveyed for potential unmarked of Underground installations protected, so Wet Conditions Precautions taken to protect employees Water removal equipment monitored be Surface water controlled or diverted. Inspection made after each rainstorm. Hazardous Atmosphere Atmosphere tested for any excavation of deficiency or build-up of hazardous gase Oxygen content is between 19.5% and 2	y marked. t of utility marks. utilities. upported, or removed when excavation is open. s from accumulation of water. y Competent Person. more than 4 feet, or when there is a possibility of oxygen es. 21%. ble gas build-up to 20% of lower explosive limit of the gas.
